

Seville was important in history as a cultural centre and as a centre for Spanish exploration of the New World.

After the discovery of the Americas, Seville became the economic centre of the Spanish Empire as its port monopolised the trans-oceanic trade and the house of trade wielded its power, opening a golden age of arts and letters.

This is important as a place of memory because the letters suggest a connection between the new and old world. The influence of the new discoveries on art and culture can be seen all throughout Seville and art still present today for people to reminisce and appreciate.
